

## HF PORTABLE ELECTRIC BENDING TOOL

### Easy to use

Can bend all diameters only by adjusting the shoe-shaft position and forms.

### Aluminium forms

Light and extremely resistant.

### Patented low friction shoe

Best quality polyamide to prevent breakage.  
Two points for lubrication

### Motor

Resistant universal electric 1010W  
230V, 50/60Hz motor.  
Double insulation. Oil resistant  
conexion cable. Safety snitch with block  
protection.

### Mechanical change of gear

New device reducer box. Switching  
direction through the reducer. Immediate  
stop when established angle is achieved.  
In manual mode bending process stops  
immediately when switching to neutral. In  
neutral mode motor without load.

### Comfort

Using the optional tripod it can work  
at the required height preventing  
contact with dirty and oily areas.

### Automatic selection angle

The angle can be adjusted  
manually. ROBEND 3000 adjusts  
easily to any angle between 0-  
180°C. Perfect to repeat identical  
angles. Reduce bending time.  
Patent requested.
