

Layout

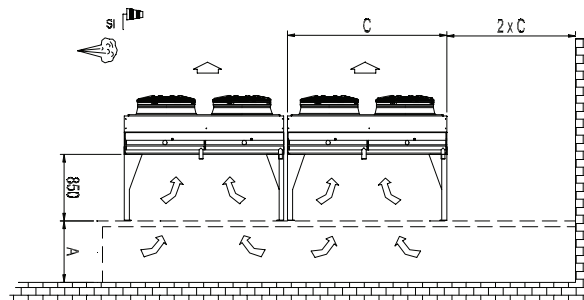

The following aspects should be considered before mounting:

- a) Verify the structures supporting capacity regarding the weight of the equipment.
- b) Avoid the installation in closed locations.
- c) When walls are present, follow the distances recommended by Alfa Laval.

HORIZONTAL INSTALLATION

> 2	> C
2	1000
ALFAGREEN Nbr.	A

- d) Special care should be taking in following the minimum distances recommended, particularly in cases for installations with two ore more units, either horizontal or vertical, in areas with strong winds.
