

The background of the entire image is a close-up, artistic shot of green water. It features several concentric ripples that create a sense of movement and depth. The colors range from a pale, almost white-green at the top to a vibrant, saturated green at the bottom. The lighting is soft, highlighting the curves of the water and creating a clean, fresh aesthetic.

Ice Systems

EcoX Range

Releasing the new climate friendly range of products

The EcoX range

Scotsman
Ice Systems

Scotsman new range using only Natural Refrigerants, which are fully compliant with the F Gas Regulation and have almost ZERO impact on both *Ozone Depletion Concerns* and *Global Warming Concerns*.

Natural Refrigerants are known as the “*Gentle Five*”. They are natural occurring, non-synthetic substances that can be used as cooling agents. These substances includes 1) hydrocarbons 2) carbon dioxide 3) ammonia 4) water and 5) air.

The new EcoX range of Scotsman is developed by using only the following Natural Refrigerants:

- 1. Hydrocarbons R 290**
- 2. Carbon Dioxide R 744**
